

Prior to Construction

- Construction planning focused on protecting the environment and minimizing community impacts.
- Project reviews/approvals to ensure implementation of thorough safety and ethical design standards.
- Notification letters mailed to impacted landowners.
- Dedicated website and phone number established.
- Open houses held to answer community questions.

During Construction

- Implementation of construction plans, adjusted as needed to ensure safety and minimize project impacts.
- Activation of traffic plan, including a temporary access road and construction staging area.
- Traffic impacts communicated proactively to affected stakeholders.
- Updates provided to community, particularly in the case of any time-sensitive or urgent matters.

Post-Construction

- Temporary access road/construction staging area will be removed.
- Impacted areas will be restored and stabilized with vegetation.
- Construction completion notifications will be sent to affected residents.
